Writing is easy when you have help from your friends! AKLN's *Modern Composition* allows you to work with your online peers to craft your writing samples and help each other recover a Language Arts credit. Smaller class size also means that you'll get as much teacher contact as you want or need. Any students who are willing to revise their work until it is proficient will do well in this course. Students will also get the chance to turn their work into visual projects for sharing online. Come work with us and create something you can be proud of!

AKLN's *Algebra I Credit Recovery* course is built for independent, self-motivated students who are willing to put in the work to make up the grade. Students will work online at their own pace, completing practice assignments that will prepare them for section quizzes and end of course exams. Discussion boards allow students to create learning communities with peers from around the state of Alaska. With the help of a highly qualified mathematics instructor at their fingertips, students can recover either a full or half credit of Algebra I. Sign up for a summer of learning and fun.

Email or call the AKLN office for registration details.
